DAVID LOPEZ JR.

SOFTWARE ENGINEER – WEB APPLICATIONS

OVERVIEW

Applying advanced consulting skills and technical expertise as a Power Platform & SharePoint Developer, delivering frequent product deployments through iterative and collaborative development.

WORK EXPERIENCE

SharePoint Coordinator (Volunteer)

American Red Cross — Jan. 2026 - Present

- Maintain and update SharePoint site content and resources for the Biomedical Services Latino Engagement program.
- Collaborate with the Program Manager to align the site with team goals and user needs.
- Implement solutions to improve site functionality and appearance.
- Resolve technical issues quickly and suggest performance enhancements.

Software Engineer – Web Applications

Booz Allen Hamilton — April 2016 - Present

Power Platform & SharePoint Development

- Developed multiple Power Apps for an Engineering Review solution by thoroughly reviewing, analyzing, refining, and reverse-engineering legacy business processes. Leveraged tools including Jira, SharePoint Online, and the Power Platform (Canvas Apps, Model-Driven Apps, Power Fx, Power Automate, Dataverse, Security Roles) to deliver robust solutions.
- Collaborated on end-to-end feature development with a strong emphasis on user interface excellence and maximizing customer value.
- Designed and implemented a SharePoint Online helpdesk ticketing system, providing users with an efficient and accessible method for reporting bugs, issues, access requests, and feedback.
- Contributed to both short-term product planning and long-term vision, supporting the scalable evolution of architectural solutions.
- Enhanced support efficiency and user satisfaction for over 100 technical and non-technical users by creating comprehensive training materials and documentation.
- Engineered innovative approaches to complex challenges while operating independently with minimal supervision.
- Provided technical leadership, mentoring, and supervision to team members as required.

WordPress Development

- Assessed and evaluated the current platform and client business requirements. Led the design and deployment of a secure, highly scalable, and robust web-based application solution.

- Efficiently migrated a SharePoint site to an open-source WordPress CMS within a tight deadline, ensuring a seamless cutover with no system downtime or data loss, and achieving substantial cost savings for the business.
- Tailored WordPress themes, plugins, PHP scripts, and enhanced site security to align with organizational needs.

SharePoint Developer

Computer Sciences Corporation (CSC) Dec. 2014 - April 2016

- Provided comprehensive SharePoint support, including account and access management, and improved user satisfaction by delivering effective training through diverse communication channels.
- Coordinated and led the management of SharePoint site collections, overseeing over 60 static websites and facilitating more than 80 domain name DNS changes within one month.
- Maintained, administered, and developed multiple SharePoint site collections, incorporated graphic design elements, and established a centralized knowledge base featuring SOPs, User Guides, FAQs, and additional resources.
- Customized web parts and master pages utilizing SharePoint Designer 2010 to enhance functionality and user experience.

EDUCATION, CERTIFICATIONS & COURSES

Humboldt State University, Bachelor of Science (BS) in Computer Information Systems, 2008

- CompTIA Security+ CE
- ICAgile Certified Professional (ICP)
- Diploma in Web Design
- Diploma in Software Project Management

TECHNICAL SKILLS

- ✓ SharePoint Online, 2013, 2010, 2007
- ✓ HTML
- ✓ CSS
- ✓ JavaScript
- ✓ Nintex
- ✓ WordPress
- ✓ Power Automate
- ✓ Power Platform
- ✓ Dataverse
- ✓ Canvas Apps
- ✓ Model-Driven Apps
- ✓ Power Fx
- ✓ Power BI
- ✓ MS Whiteboard
- ✓ MS Visio
- ✓ Data Models
- ✓ Information Architecture
- ✓ User Experience (UX)
- ✓ Coaching Others
- ✓ Jira
- ✓ Adobe Photoshop
- ✓ Software Development Life Cycle (SDLC)
- ✓ Requirements Analysis
- ✓ Database Management (MS SQL, MySQL)
- ✓ Identity and Access Management
- ✓ Stakeholder & User Engagement
- ✓ Problem-Solving
- ✓ Time Management
- ✓ Critical Thinking
- ✓ Excellent Communication
- ✓ Decision-Making
- ✓ Continuous Improvement (CI)
- ✓ Git
- ✓ ClickUp
- ✓ Software Project Management
- ✓ Knowledge Management
